

Strengthening the foundation for your planning solutions, we combine the best technology with the best service to drive the best result.

Model Audit Service from Remsoft

To deal with today's dynamic, fast-paced business environment it is critical that you have access to solutions that enhance your decision-making abilities. Woodstock models are a key decision support tool. Whether your model was built in-house, by a third party, or developed by Remsoft, you can benefit from an informed review of your model to ensure that it is performing optimally and functioning as expected.

The Model Audit Service is a consulting service offered by Remsoft to provide expert insight and recommendations on model construction and potential for improvement. This service is designed to give you confidence that your model is properly formulated and functioning at its best.

Improve Your Models

Our Model Audit Service can address a range of topics including model errors and warnings, model logic validation, missing data and more. You will receive targeted recommendations to improve your model – past model audits have resulted in matrix build-time reductions of 11% to 48% – along with insights into model design and best practice.

Ultimately, you will gain a deeper understanding of, and confidence in, your model and its use to support decision making.

THE MODEL AUDIT SERVICE CAN ADDRESS:

- Model errors and warnings
- Model logic validation
- Missing data
- Model performance
- Concerns with model results

YOUR MODEL AUDIT WILL PROVIDE:

- Specific recommendations to improve your model
- Recommendations on model design, approach, and logic
- Guidance on use of the latest features and syntax
- Opportunities for Remsoft to help you implement the recommendations

Model Audit Service is structured as a fixed-fee single engagement.
